

# Introduction

**Data:** This data used in this dashboard is provided by the Kentucky Transportation Cabinet's ([KYTC](#)) Transportation Operations Center (TOC). This information is provided free of charge and can be found in various public facing sites, emails, etc.

**Workflow:**

- The TOC operates 24/7 facility in Frankfort, KY. They are responsible for receiving, compiling, and reporting road closure information from various agencies, personnel, and systems throughout the state.
- Once verified, the TOC operators enter road closure records into their traffic management software.
- KYTC's Intelligent Transportation Systems (ITS) real-time data management system then ingests that report where it can be used for real-time analytics and reporting.
- Those reports are displayed in real-time on [GoKY](#), Kentucky's traveler information website (aka '511') and on sites like KYTC's [Weather-Related Road Closures](#) website.
